- ✓ REUSABLE & HYGIENIC
- ✓ COMFORT

SILENT FIT

This range of reusable ear plugs has been designed for maximum comfort and performance. The two flange (SNR24), and three flange (SNR25) patented design exerts only sufficient pressure within the ear canal to ensure the required acoustic seal. Made from medical grade silicone rubber, these plugs are the ultimate choice for the discerning user.

Over protection in the workplace can be extremely dangerous resulting in the inability to communicate with work colleagues or hear warning sounds of a potential mechanical failure. CK ear plugs minimise this effect. Silent fit ear plugs - available corded or un-corded in various colours.

*****NEW***** Ear plug storage box metal detectable or non detectable. Has drain holes to assist with drainage once ear plugs have been washed, and is available in different colours. Can be branded or unbranded. *****Please contact us for further details*****

Silent Fit Three Flange

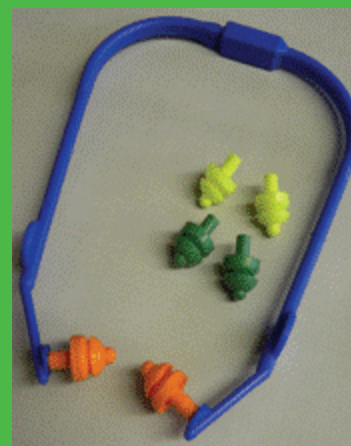

Silent Fit Two Flange
Patent no -69820878.1

EXPAND-A-BAND

This unique product has been designed to ensure maximum comfort. The adjustable pressure band allows the wearer to adjust the pressure exerted into the ear canal to suit their own comfort factor. The expand-a-band can be worn under the chin or behind the head to the wearers preference. Various colour ear plugs are available, and replacement two flange reusable ear plugs can be supplied.

* One of the main benefits of the expand-a-band design is that it allows ear plugs to be clear of work surfaces to avoid cross contamination, and aid hygiene.
